Republic of Uzbekistan: general info

- Total Area – 448 978 km²
- Agricultural land – 241 000 km² (53,6%)
- Population in 2022 estimate – 35,6 mln, Density – 77.13 ppl/km²
- Rural population – 17,6 mln (49.5%)
- GDP (nominal) – 2022 estimate: total \$69,601 mln, per capita \$2,014
- Capital and largest city – Tashkent (Population – 2,8 mln)

Agriculture in Uzbekistan

22,7% of the economically active population, 3,6 mln (2022)

Share of agriculture in total GDP is 25,1%

24.1 mln hectares of agricultural land include (100%):

- Hayfields and pastures 15.0 mln ha (62,2%)**
- 4.2 mln ha is arable land (17,4%), incl. 3.4 mln ha of irrigated land**

Orchards 0.4 mln ha (1,7%)

Other 4,5 mln ha (18,7%)

Agriculture in Uzbekistan

Main crops:

- Cotton 1.04 mln ha, 24,8 % of arable land

Grains 1.28 mln ha, 30,5 % of arable land

Oil crops 0.17 mln ha, 4,1 % of arable land

- Vegetables 0.27 mln ha, 6,4 % of arable land

Role of cotton production in economics

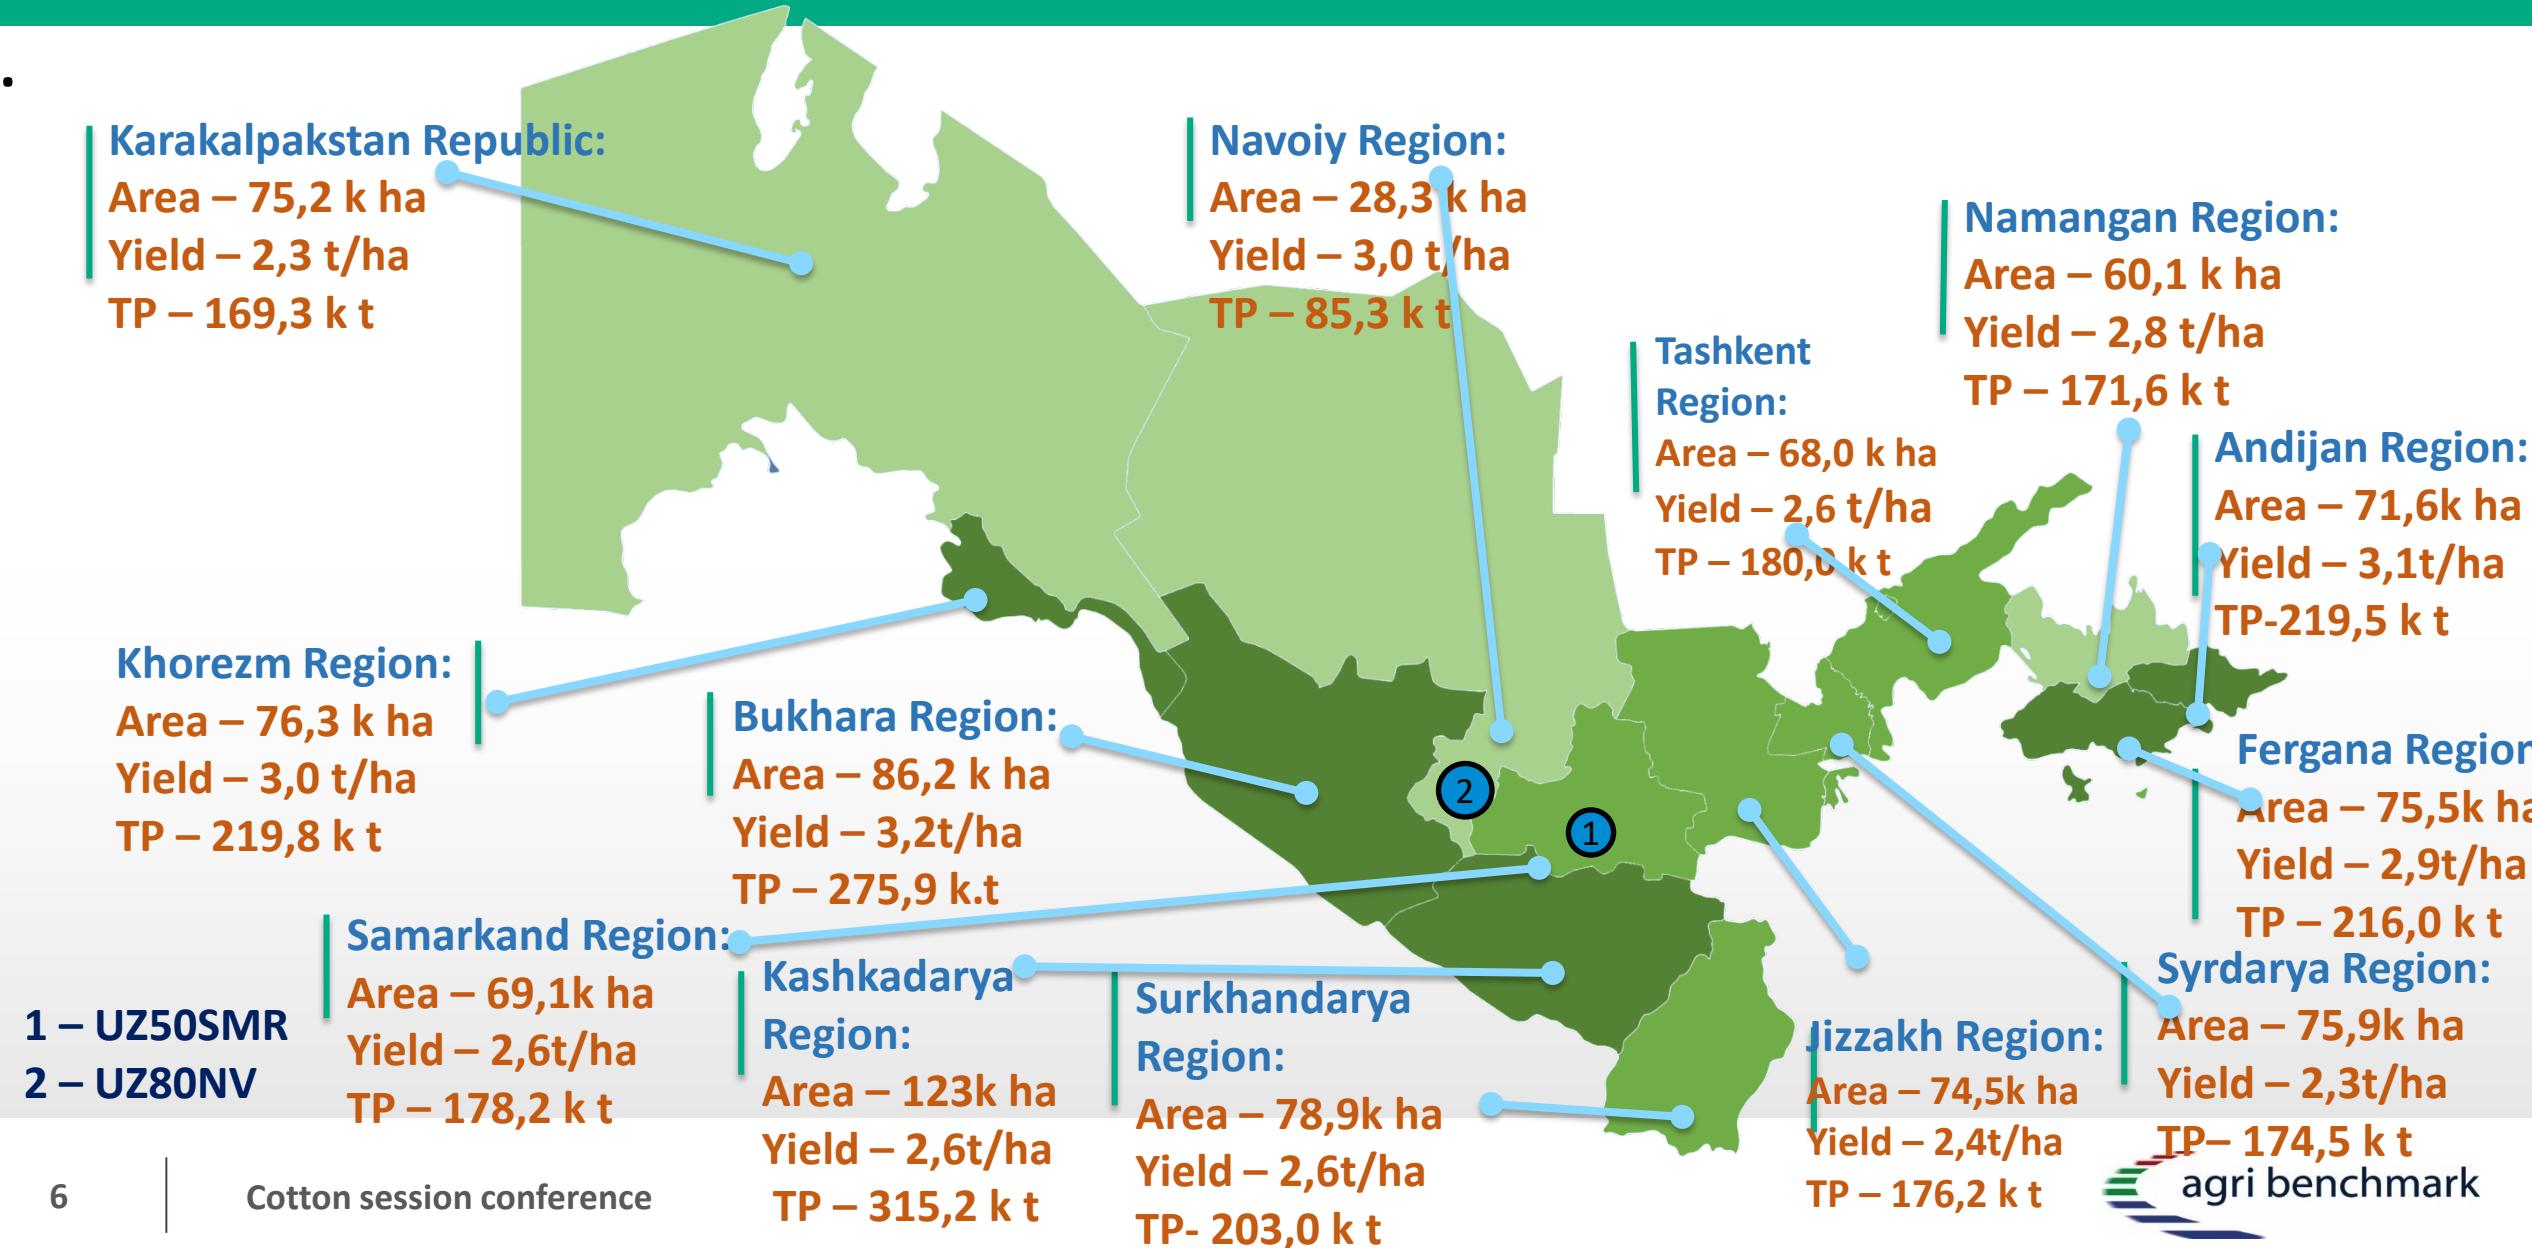

18% of the economically active population (from total of the country) is involved in cotton production

Production of the Raw Cotton takes about 7% in country's GDP (2022)

Raw Cotton is one of the main crops for export: 5,5% of the country export in 2022, (in 2000 its share was 33,1%)

Cotton is grown on the basis of full irrigation

Cotton production in Uzbekistan (avg 2012-2022)

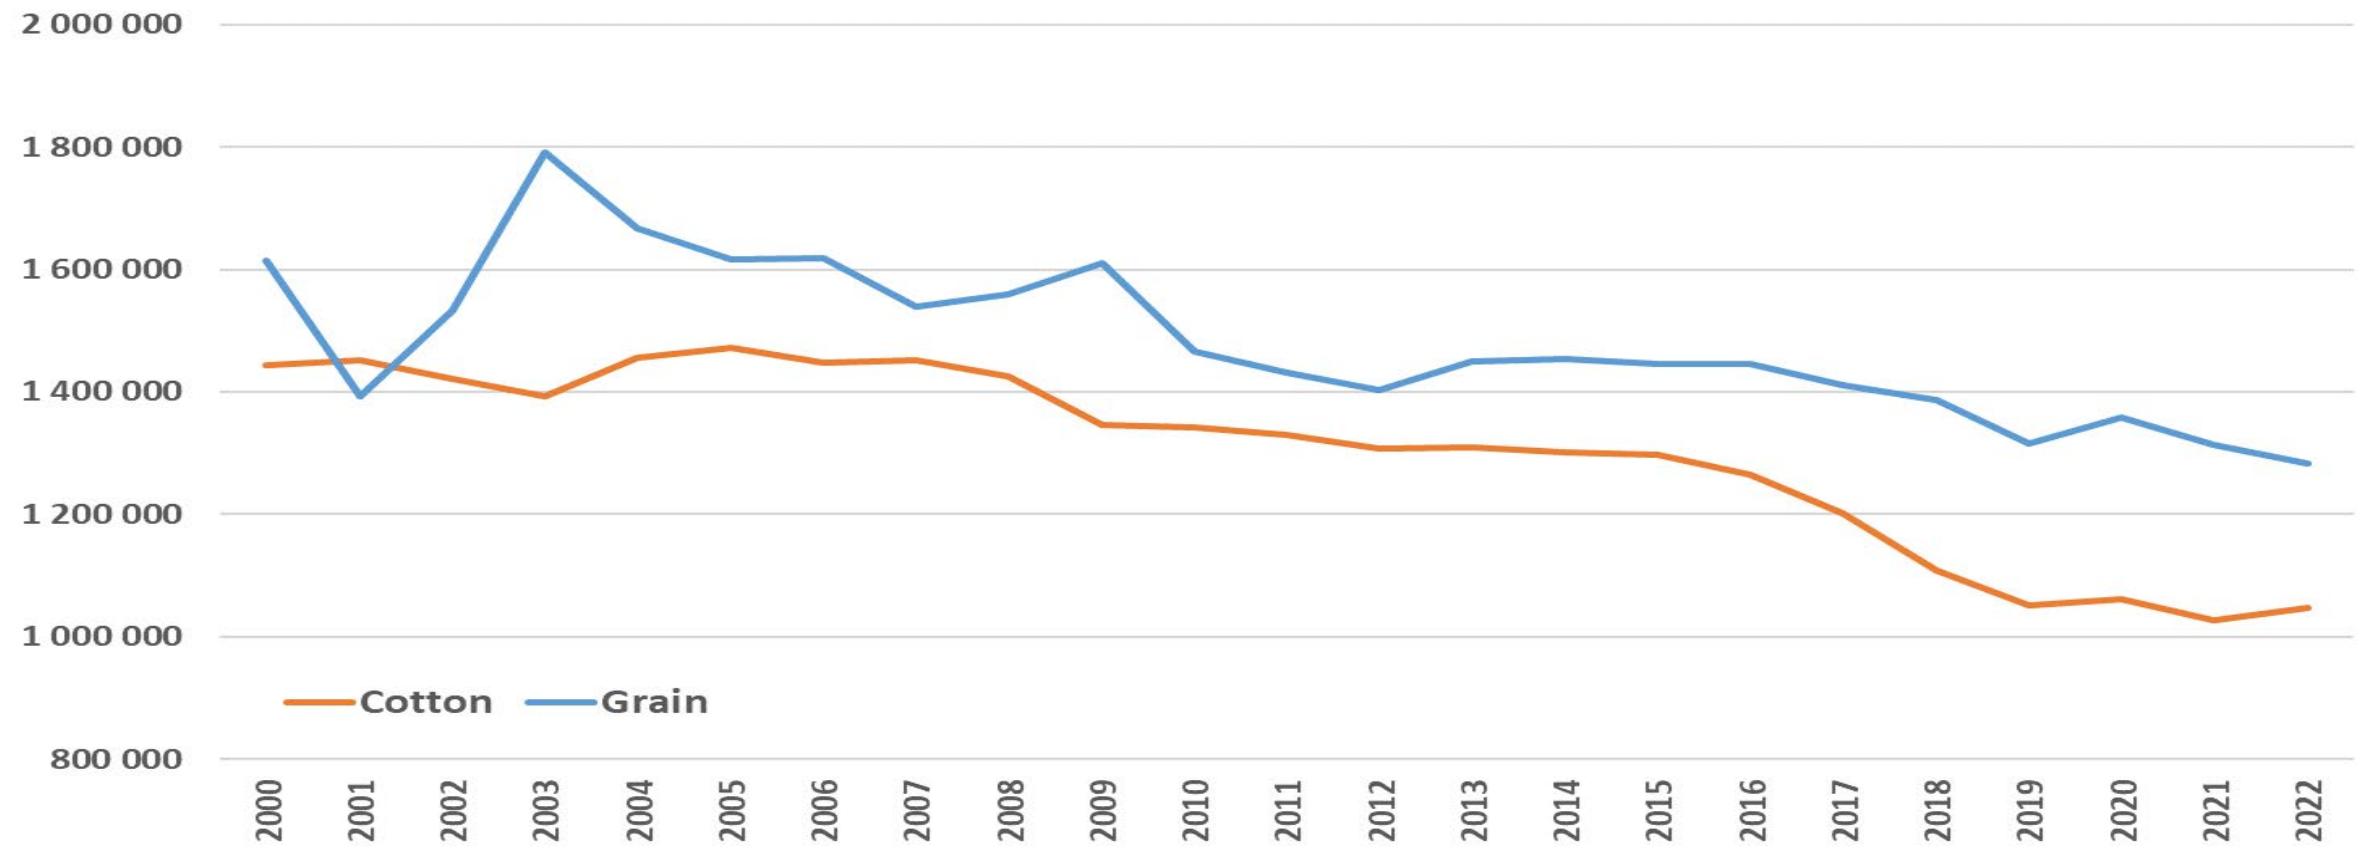

Cotton production by regions in 2022

№	Region	Production		Mechanized harvesting		Area under drip irrigation	
		k t	%	k t	%	k ha	%
	Uzbekistan	3500,7	100	634,0	18,1	53,3	5,2

11	Tashkent	39,2	1,1	35,5	503	45,5	413	37,4	189	17,1
12	Fergana	71,4	2,4	29,1	1 448	59,1	796	32,5	205	8,4
13	Khorezm	76,1	1,5	51,4	240	16,2	470	31,8	770	52,0

Evolution of main crops acreage (ha)

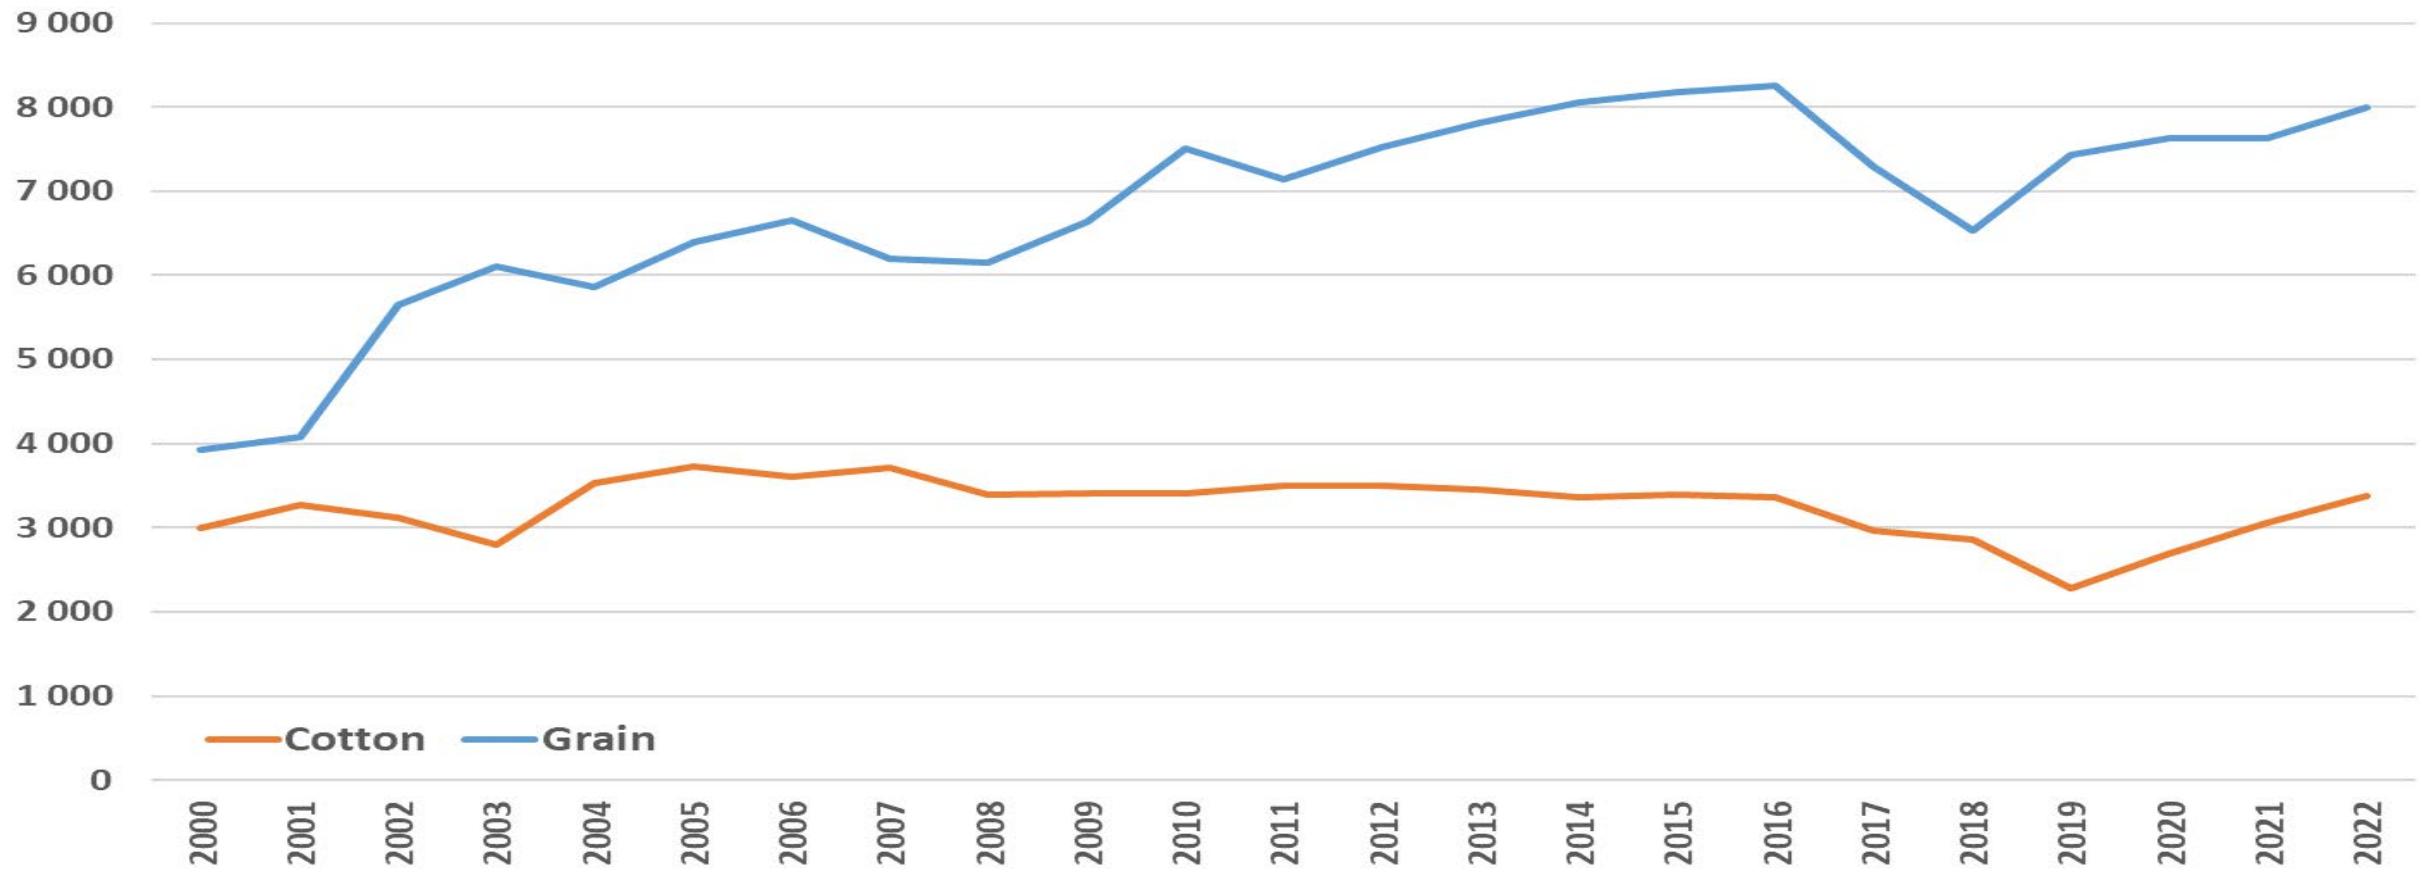

- Grain includes wheat (> 80%), corn, barley, oats, rice
- Acreage reduction in grains and cotton translated into an increase in fruits and vegetables

Evolution of the main crops yield (t/ha)

- Advancing in production technology contributed to improved yields of crops
- Cotton yield still has a potential for increase (raw cotton yield is referred to)

Evolution of the main crops production (k t)

Decrease in acreage and slight increase in yields resulted in flat cotton production
In grains (mostly wheat) yield increase outpaced acreage decline → production goes up

State procurement prices set for raw cotton

Year	Price of 1t of raw cotton, UZS	Price of 1 t of raw cotton, USD	End of December 1 \$ = UZS
1995	8159,1	326,4	25,00
1996	10545,9	182,8	57,70

agri benchmark farm overview: UZ50SMR

Farm

- Area: 49,6 ha (Government land, rent for 49 years)
- Intensive tillage – plough
- Cotton – Winter Wheat rotation (irrigated)
- Cotton: 25,4 ha; yield of fiber: 1,1 t/ha
- Winter Wheat: 25,0 ha; yield: 6,0 t/ha
- Land Rent: single land tax equals to \$12.2 per ha (137.000 UZS)

Region

Samarkand region,
Uzbekistan

Soil type: Meadow-sierozem and sierozem-meadow soil

Precipitation: 382 mm

Ploughing

Belarus 80.x

Repurchase price is \$30.450

Price of a new tractor is \$31.650

Plough 4-blade

Repurchase price of a piece made by hand is \$450

The price of a new one is \$20.000

Capacity: 0,8 ha/h

Fuel consumption: 25 l/ha

Work depth: 30 cm

Seedbed preparation

Tooth harrow
Repurchase price is \$765

Capacity: 1 ha/h
Fuel consumption: 12 l/ ha

Seeding

**Four-wheeled seeder
Repurchase price is \$4.300**

**Capacity: 1,4 ha/h
Fuel consumption: 4 l/ha**

Irrigation

Water usage is 3600 m^3 per season

Cost of irrigation is \$7 – just the cost of electricity

- $700\text{-}800 \text{ m}^3$ per ha per one irrigation**
- 4-6 times irrigation per season**

Hoeing/loosening the soil after irrigation

Cultivator

New cultivator price is \$2.500

Handmade repairment worth \$85

Capacity: 1ha/h

Work depth: 15 cm

Fuel: 8 l/ha

Spraying

OBX600 (towed sprayer)

Repurchase price is \$1.400

Capacity: 5 ha/h

Fuel: 2 l/ha

Manual harvesting

Mechanized harvesting

Threshing

Stemcutter

Repurchase price is \$220

Capacity: 6 ha/h

Fuel: 2 l/ha
