Trade data examples

Bilateral trade data (UNComtrade)

There are several sheets here with different colours:

Ctrl (red): the control sheet which is used to operate the file

- Select the reporter country with the dropdown in row 3.

- Click on the button "Click to copy country data".

- You can also choose a year (for result sheet TOP5PROD), change the currency in row 7 and the units in row 9. At present the settings are on USD and 100o tons and 1 000 000 USD.

TOP5, PROD, TOP5PROD (green): results

- TOP5: Here the export destinations and import origins are displayed for the TOP 5 and the rest in absolute quantities, their composition and the USD values and their composition from 1996 to the latest available year.

- PROD: For the same time period and the same items, the composition of the trade is displayed.

- TOP5PROD: For the year selected in sheet Ctrl, you see the destinations and origins by product.

Converter (blue): performs the calculations

Country sheets (no colour): they hold the individual country data
